

Someone asked for your app today. Did you see it?

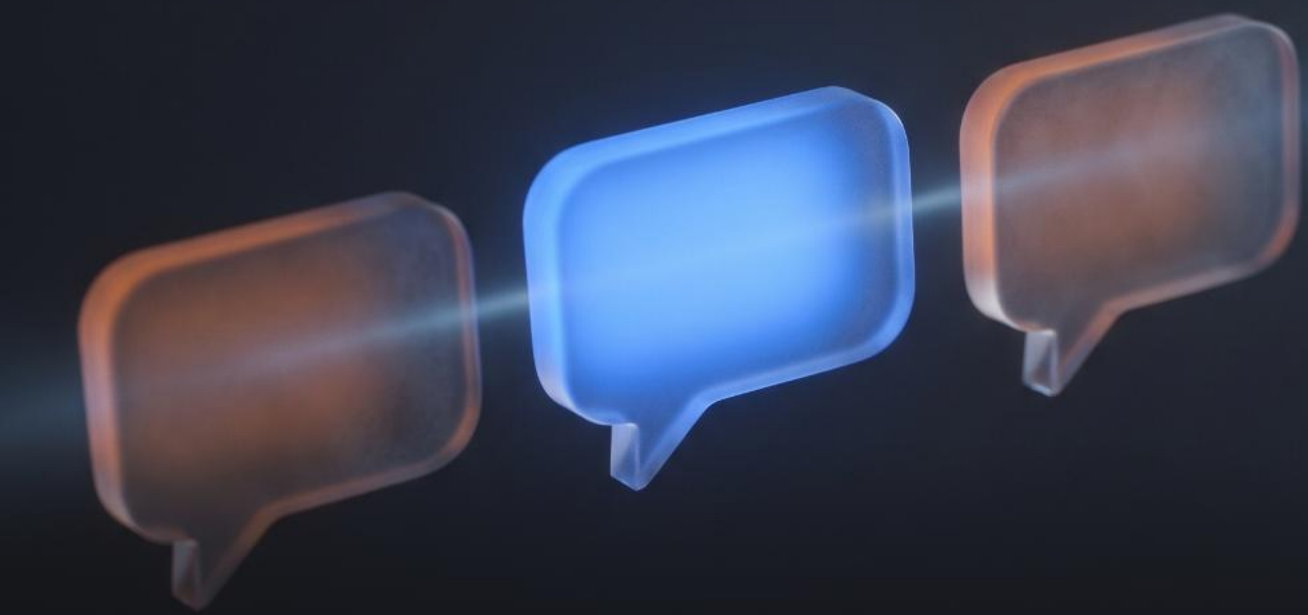

Top places where people ask for an app like yours

THE REASON

Buyers ask in public. Then move on.

Every day someone posts "any tool for...?"
Fresh threads get the most eyes.
You can't read every thread every day.
The phrase list is at the end.

STEP 01 / 04

Learn the phrases buyers use

"Any tool for...?"
"Alternatives to [competitor]?"
"How do you handle...?"
Now search for them.

STEP 02 / 04

Search where buyers talk

Pick 3 subreddits your buyers read.
Search each phrase, sorted by new.
Save every post that fits your app.
Too many to read? Here's the fix.

STEP 03 / 04

Let Claude sort the signals

Paste the saved posts into Claude.
Ask which ones describe your problem.
Keep the top 5. Skip the rest.
Then answer them the same day.

STEP 04 / 04

Answer first. Mention last.

Solve their problem in the reply.
Say you built a tool, if it fits.
No link unless they ask.
Repeat it every day.

They're asking. Be there.
