

BUILD IN PUBLIC

Your first 100 paying users won't come from ads

01 They come from free work

My first 2 came right after launch.
One how-to video on YouTube.
One Reddit thread.
But I made one big mistake.

02 I never knew which one

I never found out which one worked.
So I couldn't do more of it.
Here's how you get to 100.

03 Teach, don't pitch

The video showed how to use the app.
People search for help, not ads.
Help gets found.
But you can also go to them.

04 Ask where buyers already talk

I asked eBay sellers on Reddit
how they list postcards in bulk.
They talk there every day.
The last lesson costs nothing.

05 Ask every user where

One question at signup:
"Where did you find me?"
Do more of what works.
That's how 2 becomes 100.

Teach. Ask. Track.

I build in public, misses included.
